WHAT WE DO

MAJJI Solutions LLC is a **Service-Disabled Veteran-Owned Small Business** delivering cybersecurity, IT operations, and program support to the DoD and federal defense community. Our leadership brings more than a decade of TS/SCI-cleared federal delivery across Air Force, Marine Corps, Navy, Space Force, and Special Access Program environments — with **20+ Authorizations to Operate** delivered through some of the most demanding compliance landscapes in the federal government.

Our capability spans the full federal IT stack — cyber engineering, IT operations, infrastructure, and program leadership. We've operated at every level of the mission chain, so we assess and communicate risk accurately at every layer — from the CISO to the network node. The result: programs that are not just compliant, but genuinely secure.

We don't just advise. We execute.

CORE SERVICES

Cybersecurity & Cyber Defense

End-to-end cyber defense, threat monitoring, and incident response across federal and classified networks — including garrison, tactical, and SAP environments.

Risk Management Framework (RMF) & ATO

Full lifecycle RMF execution — categorization, controls selection, STIG implementation, assessment, ATO package development, and continuous monitoring. 20+ ATOs delivered including complex 3-year multi-enclave authorizations.

CCRI / SV-11 Support

Inspection preparation, STIG remediation, and SV-11 compliance across enterprise environments. We prepare programs to pass — and stay compliant after.

IT Operations & Infrastructure Modernization

Infrastructure management, network engineering, server and database administration, data migration, and Help Desk support (Tiers I–III) across multi-installation enterprise environments.

Intelligence & Program Support

Intelligence analysis, counterintelligence support, program management, and cleared staff augmentation for sensitive and classified programs including SAP environments.

Consulting, Training & IA

Cybersecurity training, information assurance, compliance advisory, and SSP/POA&M/SCTM documentation support for federal programs and cleared teams.

WHO WE WORK WITH

- Prime contractors seeking cleared SDVOSB subcontractors for DoD task orders
- DoD programs requiring full RMF / ATO lifecycle execution and ConMon support
- Federal agencies and installations preparing for CCRI, CMMC, or FISMA compliance
- Programs requiring TS/SCI cleared personnel ready to deploy without ramp-up delay
- Multi-installation commands managing concurrent cyber operations across multiple bases
- Organizations modernizing classified IT infrastructure — garrison, tactical, or SAP networks

CORPORATE EXPERIENCE

Branches: U.S. Air Force · U.S. Marine Corps · U.S. Navy · U.S. Space Force · Special Access Programs (SAP)

Environments: Garrison Networks · Tactical Networks · Classified Enclaves · Multi-Installation Enterprise · CONUS & OCONUS

WHY MAJJI — BY THE NUMBERS

20+	5+	8–12
ATOs Delivered	Branches & Programs	Yrs Avg Experience

WHY MAJJI

Cleared & Deployable

TS/SCI cleared personnel ready for classified environments — zero ramp-up delay, zero clearance risk.

Proven ATO Track Record

20+ ATOs including complex multi-enclave, 3-year authorizations across garrison, tactical, and SAP environments.

Multi-Branch Experience

Air Force, Marine Corps, Navy, Space Force, and SAP — CONUS and OCONUS. We know how each branch operates.

Execution Over Advisory

We own deliverables and drive results. Built ATOs from scratch, hardened networks under pressure, executed RMF across simultaneous multi-installation environments. Accountable execution — not bystander consulting.

360° Risk Understanding

Risk assessed and communicated from leadership to the network level — security posture enforced at every layer.

SDVOSB & Multi-Cert Advantage

SDVOSB, WOSB, and MBE — helps primes meet multiple set-aside and subcontracting plan requirements simultaneously.

COMPLIANCE & STANDARDS

- NIST SP 800-37/53
- FISMA
- Zero Trust
- SSP/POA&M/SCTM
- CNSSI 1253
- ConMon
- NIST 800-171/CMMC
- DISA STIGs/eMASS
- RMF/ATO Process
- CCRI/SV-11
- ACAS/Nessus
- NIST CSF 2.0

Ready to Team or Subcontract?

We actively seek teaming arrangements and subcontract opportunities with prime contractors. MAJJI's cleared cyber talent, proven RMF execution, and multi-certification status make us a high-value partner for DoD and federal IT programs.
