Established in 2021, Shellback Construction, LLC is a Commercial Construction Management Company. We are 100% Veteran-Owned, a Certified Service-Disabled Veteran-Owned Small Business (SDVOSB) and a Texas Certified HUB.

Shellback is dedicated to delivering unequaled construction management and craftsmanship to federal, state, and local governments. As Navy and Marine veterans, we chose the U.S. Navy's time-honored Shellback (designation given after crossing the equator on a military vessel) as our logo and mascot. It symbolizes the strength, trust, integrity, and commitment to every project we have the honor to work on. Will became a Shellback in 1992 upon crossing the equator on the U.S.S. Independence (CV 62) aircraft carrier. Daniel is a former Marine and Certified Professional Constructor (CPC).

What we do:
- Construction Management
- Construction Manager-At-Risk (CMAR)
- Ground up, Large Renovations and Laboratories
- Jail Renovations and Additions
- Commercial Construction Rescue
- Nationwide Operating Capability

Recent Projects & On the Horizon:
Shellback recently managed an $8 million EMS project, $2.6 million USDA research laboratory and a $1.6 million first-of-its-kind drone laboratory for Texas A&M University. Although Shellback has become well known for complex laboratory builds, we are honored to be awarded a VA MATOC for construction and maintenance at National Cemeteries for the Central North American region.

How we excel:
- In-depth Understanding of the Construction Process and Owner's Needs
- Robust Safety Program and Planning (zero injuries to date)
- Constant and Open Communication Up and Down the Chain of Command
